Invacare® **Comet™ Heavy Duty**

Well-proportioned, Comfortable, Supporting: The *Invacare Comet HD*

The Invacare **Comet HD** is part of the Invacare Comet family, renowned for its safe, fast and enjoyable drive. This rugged outdoor vehicle is ideal for users weighing up to 220 kg. Packed with safety features, this powerful scooter will take you to your destination in the most direct and secure way. The large contoured extra padded seat together with four individual adjustable suspension units ensures an exceptional driving experience. The **Comet HD** has been designed to allow for additional weight capacity and has passed thorough tests in the German independent TÜV test laboratory.

➤ Durable Design and Power in One

Even for users with a weight of up to 220 kg, safety is never a concern with the **Comet HD**. All necessary precautions for guaranteeing the stability and safety of the scooter have been taken into consideration during the design process.

➤ That Comfortable Feeling

The XL contoured seat has been developed in conjunction with therapists to ensure optimum seating comfort. The seat base and height- and width-adjustable armrests have been reinforced to allow for additional stresses and can easily be used as supports when getting on and off the scooter. Seating comfort can be increased by using the pneumatically adjustable lumbar support.

Features

Reinforced seat column

It ensures stability and safety while seated.

Reinforced armrest

It allows for the additional stress of getting on and off the **Comet HD**.

Unique suspension system

It has proven itself in the professional mountain biking industry and allows for simple independent user adjustment.
